DETAILED ACTION

Pelim./Amdt.

1. Receipt is acknowledged of the Amendment filed 02/01/2005.
2. Claims 1-11, 15-16 and 18-21 are pending, and claims 12-14 and 17 has been cancelled.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 19 is rejected under 35 U.S.C. 103(a) as being unpatentable over Taniguchi et al. (US 6,700,634 B2) in view of Seki (JP 06235823A).

Re claim 19: Taniguchi discloses a planar surface illuminator having a light guide plate defining a side face, a bottom plate, and a top face opposite to the bottom plate, and Taniguchi discloses a plurality of LEDs located along the side face, a plurality of dots formed on the bottom face (8 and 21 in Fig. 10), some of the dots (8) are essentially located at the shortfalls area so as to provide uniform emission of light (col. 4, lines 43-61). Taniguchi does not disclose that the dots located at the shortfall areas are equipped with fluorescent particles. However, Seki teaches that a light-guide layer of a dot pattern consists of acryl binder and fluorescent pigment (See Constitution in the Abstract). Further, Seki teaches that the light guide layer of the dot pattern provides uniform surface emission of light (See Purpose in the Abstract). It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify

Art Unit: 2875

Taniguchi's dots to include fluorescent particles as Seki taught in order to provide uniform emission of light.

Allowable Subject Matter

5. Claims 1-11, 15-16 and 18 are allowed.
6. Claims 20-21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
7. The following is a statement of reasons for the indication of allowable subject matter:
With regard to claims 1, 15 and 20-21, although the prior art of record, Seki, discloses a dot having fluorescent pigment, Seki fails to disclose that the dot is made of melamine-based fluorescent particles, which is melamine-based particles polymerized with fluorescent dye. Claims 2-11, 16 and 18 depend from claims 1 and 15. Therefore claims 1-11, 15-16, 18 and 20-21 are patentable over the prior art of record.

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period

Art Unit: 2875

will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
